

Single Girder Eot Crane

Single girder crane is composed by the main girder, end carriages, electric hoist, and electric control system.

As it has firm structure, light weight and small size, it is widely used in factories.

Main Parameter:

Lifting capacity: 0.25~32tons

Work duty: Class C or D

Lifting height: 6~40mtrs

Power: 380v/50hz/3p or as customer request

Working Temperature: -25~40° C

Control type: pendant handle, or remote, or cabin

Safety feature

1. Weight overload protection device: If the material is over the capacity, the single girder [EOT crane](#) will give a sharp warning for protection itself.
2. Limit switch: To prevent over hoisting & over lowering of hook.

3. Top quality long time bearing polyurethane materials buffer.
4. Room control or remote control to avoid any injury to the operation staff.
5. Voltage lower protection function.
